

Style MM3025: Alumina Fabric

0.019" Thick, Twill Weave

REVISED: SEPTEMBER 6, 2011

Style MM3025 is a tough and durable woven fabric made from high strength continuous alumina fibers. Boron free, this material performs with superior flexibility at service temperature. Typical applications in the petrochemical, steel and semiconductor industries.

Weight: 13.5 oz/sq yd

Thickness: 0.019"

Breaking Strength: 243 lbs/inch

Base Fiber: Alumina

Weave: Twill

Width: 40"

Roll Length: 33 ft

Service Temperature: 2300°F
