

Style MMR22-1800: Leached Silica Fabric

0.027" Thick with Reflective Composite

REVISED: SEPTEMBER 18, 2013

McAllister Mills MMR22-1800 offers a radiant heat barrier for high-temperature environments. A composite layer of aluminum is incorporated on the fabric's surface to maximize radiant heat reflection and protection.

Product Type: 1800F Cloth Reflective

Style Width: 40"

Maximum Service Temperature: 1800°F

Short Duration Radiant Service Temperature: 3000°F

Weight: 22 oz/sq yd

Thickness: 0.027"

Treatment: Reflective Composite

Roll Length: 50 yd
