

Style MPG650: Fiberglass Plus+ Tape

0.062" Thick

REVISED: JANUARY 1, 2014

Fiberglass Plus+ is an exclusive line of high-temperature textiles made with the latest development in high-temperature fibers. Not a fabric coating or treatment, Fiberglass Plus+ is a new fiber designed to take 1350°F, and remain flexible and strong in service. Where vermiculite coated glass products often fail as heat exposure grows above 1000°F, and is no longer intermittent, Fiberglass Plus+ delivers performance you can count on. This family of fibers exclusively available from McAllister Mills is non-respirable, will not burn, and is asbestos and ceramic fiber-free for a safer working environment. These tapes are unaffected by most acids, alkalis, or solvents. Fiberglass Plus+ glass is soft, flexible, and durable at 1350°F service temperatures which allow a longer life cycle. Available in a full range of products from tapes, fabrics, ropes, and tadpoles, to custom-engineered solutions.

Base Material: Fiberglass Plus+ Fiber

Weave: Plain

Thickness: 0.062" (+/- 10%)

Width: 1/2" – 6"

Roll Length: 100 ft

Service Temperature: 1350°F
