

Style MM50MTS: Maxsil®Tex Silica Fabric with Vermiculite Coating

0.125" Thick with Vermiculite Coating

REVISED: SEPTEMBER 6, 2011

One of the most durable high-temperature fabrics on the market today for resistance to over 2000°F (1100°C). Fabrics are manufactured from continuous filament amorphous silica yarns then texturized to add volume and a proprietary abrasion-resistant finish added. Fabrics are heat treated.

Applications include: Expansion Joints, Heat Shields, Insulation Pads, Oven/Furnace Door Seals, Furnace Curtains, etc. This product is not manufactured from leached fiberglass fabric.

Weight: 55 oz/sq yd (1100 g/sq m)

Thickness: 0.125"

Fiber: Amorphous Silica

Treatment: Preshrunk

Weave: Twill

Width: 40"

Roll Length: 50 yd

Service Temperature: 2000°F

Shrinkage: Less than 2%

Coating: Vermiculite - Natural Color
