

Style MMCLNSVC150: CleanService™ Mat

Super Absorbent CleanService™ Mat

REVISED: MARCH 7, 2019

The spill catcher that combines the best super absorbent textile materials into one flexible, edge sealed mat. Delivers the perfect service aid for M.R.O. of industrial equipment, as a pad on top of your workbench for repairs, and motor vehicle servicing.

Over 16 ounces or 40% more of typical motor oil can be absorbed per square foot of CleanService™ mat vs. other mats. Sealed edges and back, minimizes leach out contamination. CleanService™ mats are available in standard sizes or custom shapes. Absorbing petroleum-based products during equipment dismantling or vehicle servicing. Minimizes spills, ground contamination, and keeps the repair area clean. Minimizes edge leaks when handled.

CleanService™ composite construction starts with an absorbent felt face, followed by recycled highly absorbent natural fiber material, and is backed with a barrier layer to minimize seepage. Fluids stay more in the mat, minimizes contamination. All CleanService™ mats are finished with no open edges and sealed to minimize contaminants leaching from the mat. Water will run out of the mat, but most contaminants stay in. PSA (pressure sensitive adhesive) can also be added to the barrier side to hold the mat in place.

PAD SIZES

- 12" x 18"
- 18" x 24"
- 18" x 48"
- 29" x 48"
- 48" x 58"
- Custom sizes available by request
